Rockville MD 20852

The alternative medicine/natural supplement industry should be an integral part of testing processes and labeling decisions for its products. Your agency should not exclude involvement of the industry it proposes to legislate. Industry participation is essential to guarantee quality and contents of nutritional products.

We ask that an advisory committee representing the alternative medicine/natural supplement industry be allowed to work with the FDA in research, testing, and evaluation processes to assure credible labeling. We want the alternative medicine/natural supplement industry to be an integral part of the testing process and labeling decisions.

Sincerely, \_\_\_\_\_
